INSTALLATON OF JAVA:

STEPS TO INSTALLATION OF JAVA:

1. Open a web browser. Visit the official Oracle JDK website.
2. Now download the JDK 25 Version from the website.
3. Download the MSI INSTALLER VERSION.
4. Now double click on downloaded file click next.
5. Therefore, the java is successfully installed.
6. Now open the command prompt and check the java version and java complier version.

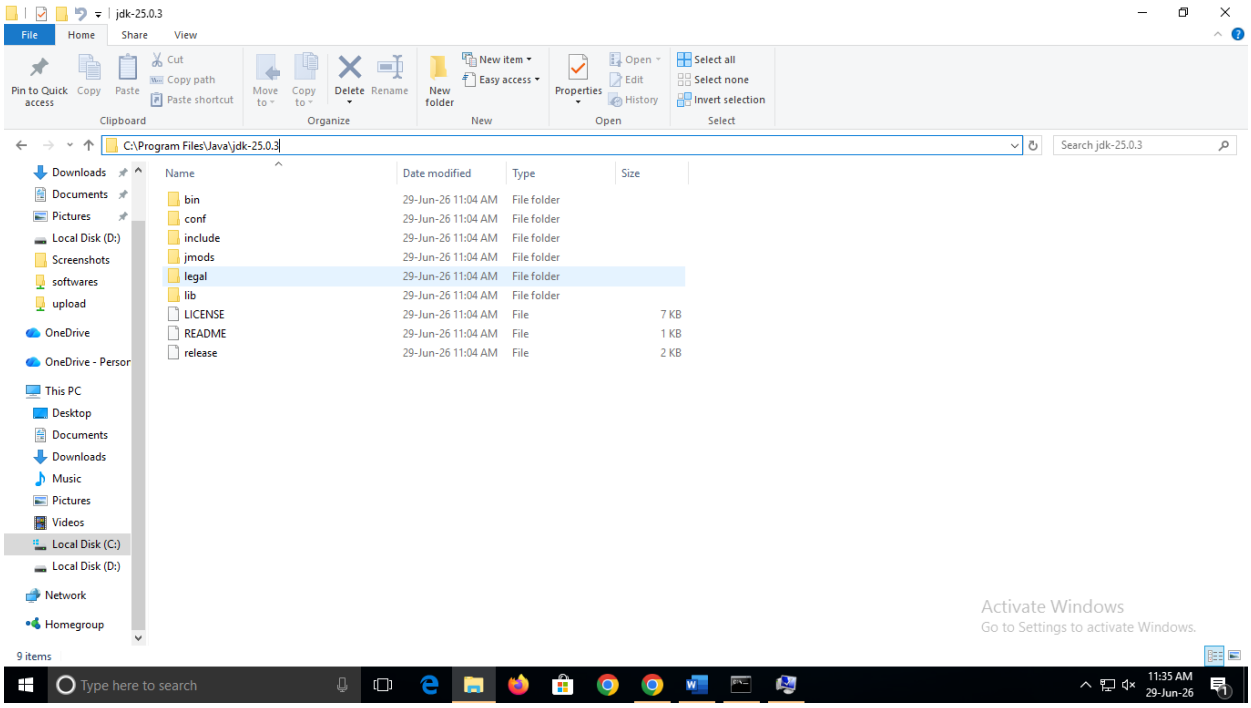

Configuring Java on Windows:

Step 1: Find Java Installation Path

After installing Java, locate the JDK folder.

Example:

C:\Program Files\Java\jdk-25

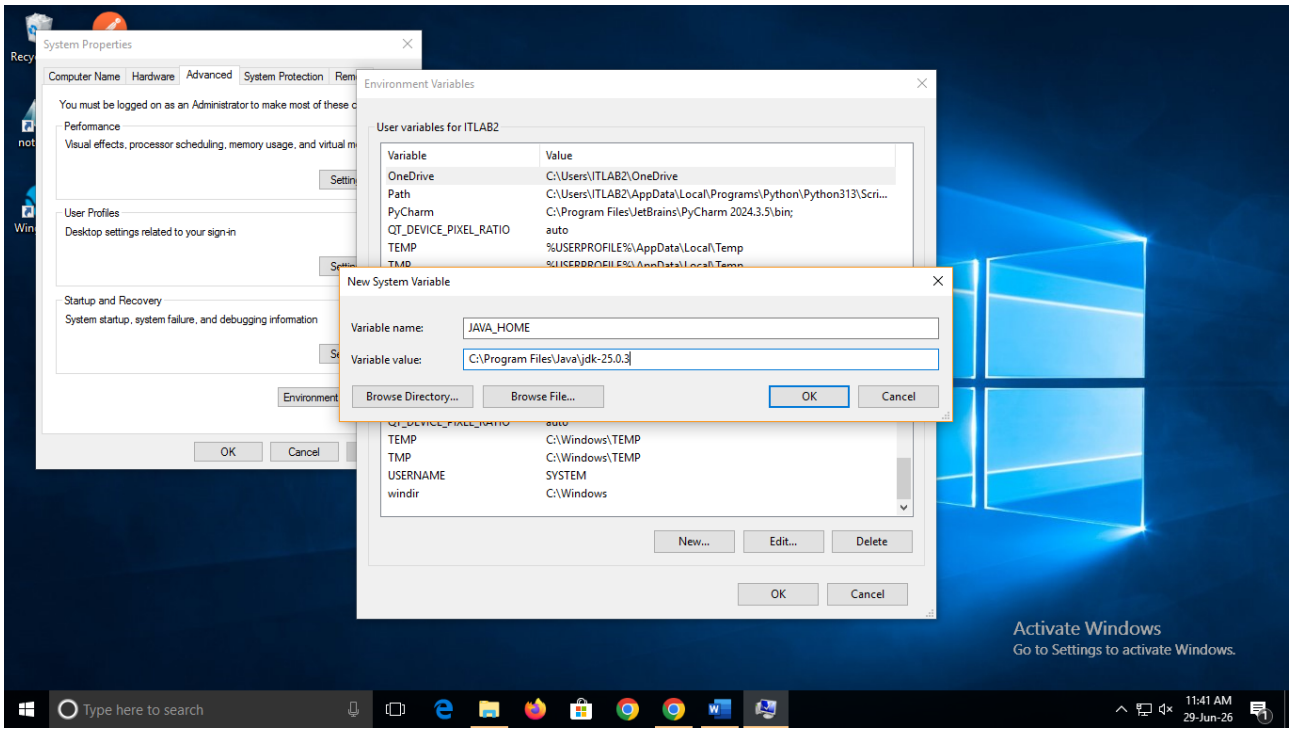

Step 2: Set JAVA_HOME

1. Press **Windows + R** → Type sysdm.cpl → Press Enter.
2. Select **Advanced** tab.
3. Click **Environment Variables**.
4. Under **System Variables**, click **New**.

Enter:

Variable Name : JAVA_HOME
Variable Value: C:\Program Files\Java\jdk-2

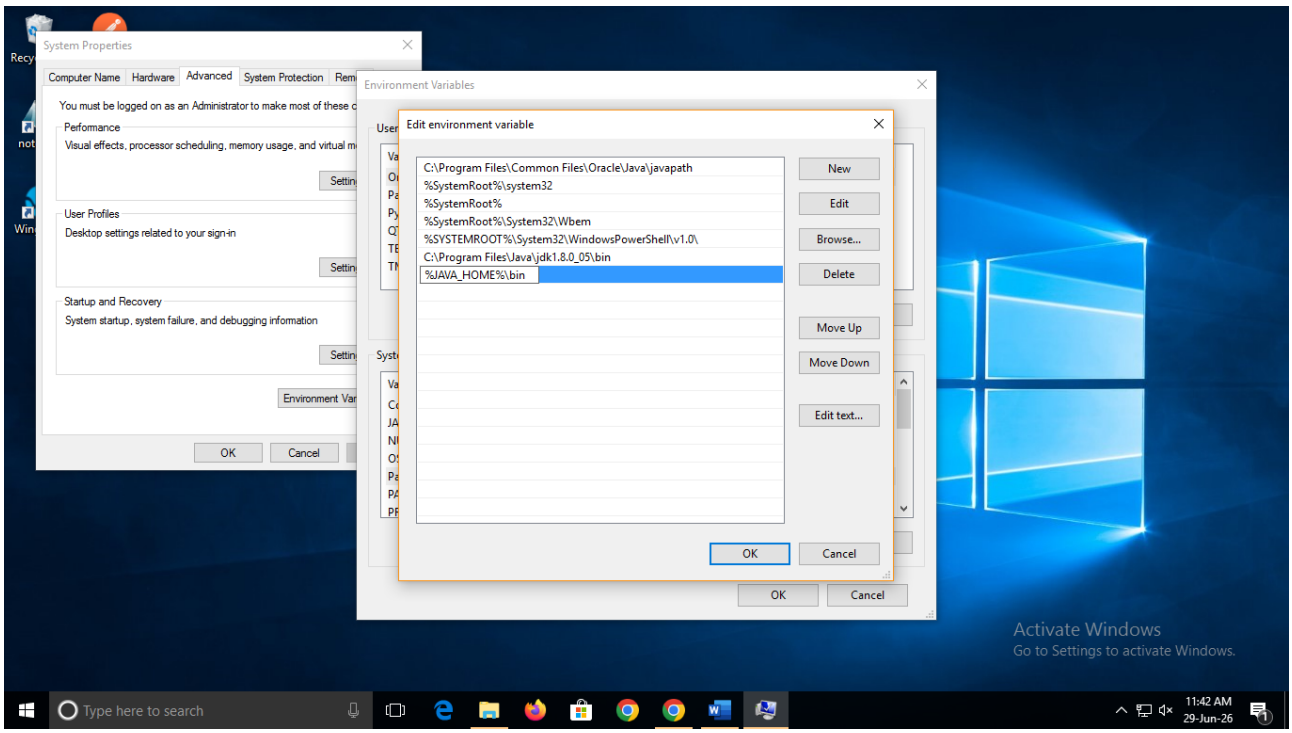

5. Click **OK**.

Step 3: Update PATH Variable

1. Under **System Variables**, select **Path**.
2. Click **Edit**.
3. Click **New**.
4. Add:

%JAVA_HOME%\bin

5. Click **OK → OK → OK**.

Step 4: Verify Configuration

Open a new Command Prompt and execute:

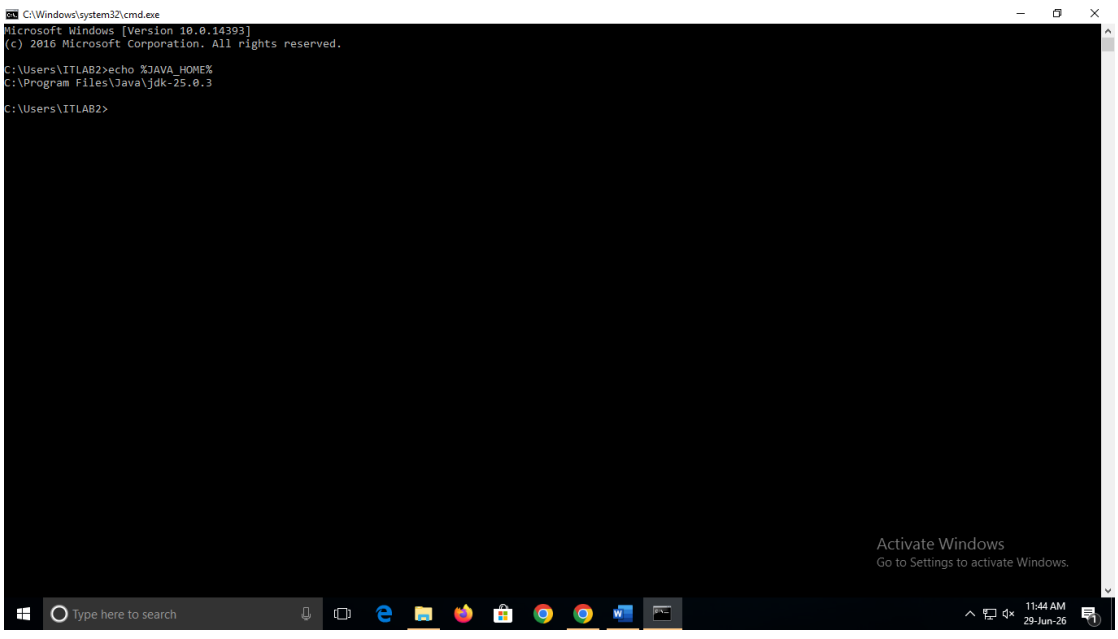

echo %JAVA_HOME%
Output:

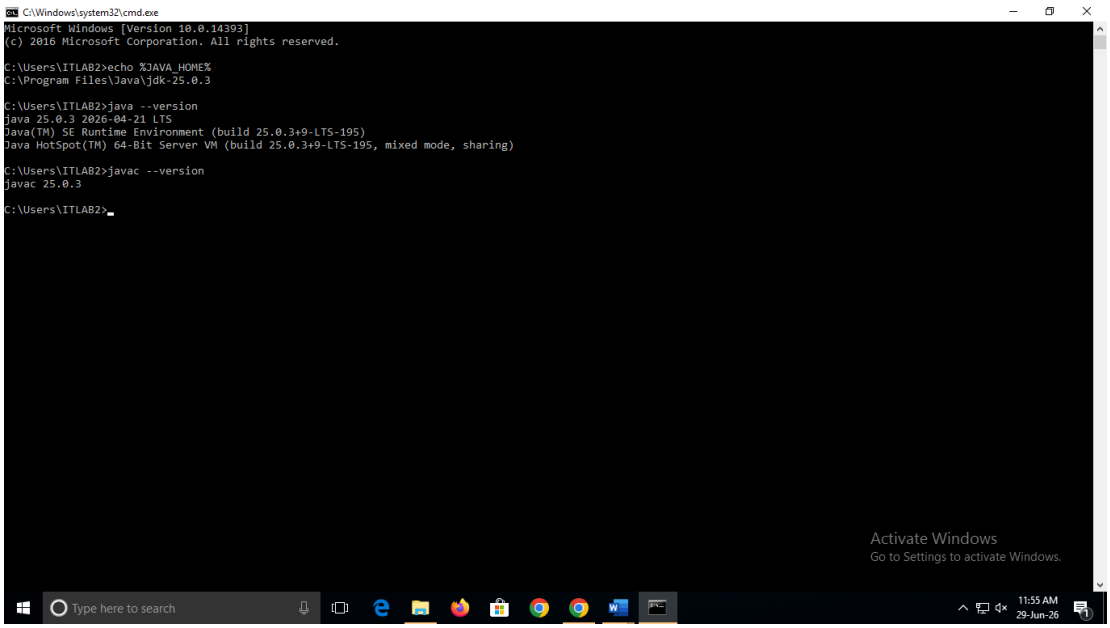

C:\Program Files\Java\jdk-25
Check Java version:

java --version
Check Java compiler:

javac --version
Sample Output:

java 25
javac 25

Common Commands:

java --version :: Check Java Runtime
javac --version :: Check Java Compiler
where java :: Display Java executable path
where javac :: Display Java compiler path
echo %JAVA_HOME% :: Display JAVA_HOME value
